(Quadrangle)

Two 5-foot tall **AQUABAR WaterSign** engraved displays are now splashing away at retail establishments in Uptown for all of Dallas to see. "We encourage everyone to 'get their hands wet' by experiencing the device in person at one of these prestigious Uptown retailers," says Patrick Freeman, attorney-inventor and **AQUABAR** founder.

With recent sales to Blackstone Group's *LXR Luxury Resorts & Hotels* in Puerto Rico, *SKYY Vodka* via liquor distributor PMA Canada, tradeshows in Las Vegas and Texas—and an expected backstage performance by the unit at the upcoming *Golden Globe Awards* in Hollywood—it's been a busy year for the world's first portable waterfall product display & signage device!

This one-of-a-kind promotional device serves as a captivating bar back liquor display in chic nightclubs, restaurants, casinos and at catering events where users customize the backside vinyl signage for any special event. It also functions as a unique **Signage Marquee** and/or **Product Display** inside storefront windows, hotel lobbies and trade show booths. The falling water can be

seen front and back, and each unit comes with an **LED Light Pan** in white, blue, or blending red/green/blue which illuminates from beneath, adding special aura, even during daylight. An optional **Stand On Wheels** raises the height to nearly nine feet and allows users to roll the experience from event-to-event; hotel lobby to swimming pool or dining room, catering hall to casino floor, in-store promotion to storefront window, etc. A dozen **Swimming Acrylic Ice Cubes** also come with the unit and dance around inside the top two tanks adding additional 'eye-candy' effect. Hand-crafted out of luxurious half-inch acrylic, this patent-pending, **Portable Water Feature** requires no outside plumbing or water source and can be set up by the buyer within half an hour. A **Remote Control** allows users to turn it off and on at any time, creating a magical line of water that visibly fills the clear acrylic water chamber before spilling over the top.
